EDUCATION

Northwestern University

Evanston, IL

Bachelor of Science, Computer Science

Sep 2023 – Jun 2027

- **Relevant Coursework:** Agile Software Development, Design & Analysis of Algorithms, Scalable Software Architecture, Intro to Networking, Foundations of Security, Intro to Databases, Human Computer Interaction
- **Languages:** English, Mandarin

EXPERIENCE

Frontend Engineering Intern

Jan 2026 – Mar 2026

TikTok

San Jose, CA

- Led frontend development within the Creator Search Insights ecosystem using **React** and **TailwindCSS** to enhance creator decision-making with video performance insights and analysis
- Integrated **A/B testing** and event tracking, enabling usage of click-through rates and visibility metrics to validate design decisions
- Coordinated with Backend and Design teams to align on API definition, gather project requirements, and implement UI designs, shipping an AI-powered analysis tool to production

Fullstack Engineer

Oct 2025 – Mar 2026

Northwestern University WildHacks

Evanston, IL

- Spearheaded development of user-facing dashboard with **Next.js** and **Firebase** to provide authentication, event check-in, team matching, judging, and resume book functionality to **300+** attendees
- Identified security gaps and instituted **Firestore** rules, **Content Security Policy** headers, **HTTP cookie** protection, and input validation to prevent XSS attacks
- Founded **3 GitHub Actions** workflows to automate linting and formatting, and synchronize development and production Firebase environments to maximize developer experience
- Initiated cross-team alignment with Logistics and Marketing to define project requirements and UI direction during early development

Software Engineer

May 2025 – Jul 2025

Northwestern University Men's Soccer

Evanston, IL

- Engineered a **React** web application to algorithmically generate weekly training schedules for a **25+** player college soccer team, using **Zustand** for state persistence and **React Hook Form/Zod** for validated data entry
- Built a **Python** CLI scraper to aggregate opponent team data into downloadable PDFs, utilizing **BeautifulSoup** and **Pandas** libraries to extract and parse **HTML** table data, cutting scouting report creation time by over **80%**

Frontend Engineer

Jan 2025 – Jun 2025

The Recyclery Collective

Chicago, IL

- Drove scoping process for website revamp project by interfacing with **3** client team members to craft detailed project specifications and describe realistic user stories
- Designed **10 Figma** components and pages to improve page layout responsiveness across various devices
- Contributed **4,000+** lines of **React** and **TailwindCSS** code, improving **Google Lighthouse** metrics by **60%**
- Evaluated **25+** **GitHub** pull requests, maintaining code quality and style consistency across entire repository

SKILLS

Languages: JavaScript/TypeScript, Python, HTML, CSS, PostgreSQL, MySQL

Frameworks/Libraries: React, Next.js, Zustand, React Hook Form, Zod, React Query, Node.js, Express, TailwindCSS, Pandas, BeautifulSoup

Tools: GitHub, Amazon Web Services, Firebase, Supabase, Docker, Figma, Neovim, Visual Studio Code, Google Lighthouse
